Eligible to work in the U.S.A. as a citizen.

Profile

Software Engineer with a background in data-driven performance analysis and biology. Built and shipped real-time computer-vision applications that drove a competitive program’s rise from Division 3 to Division 2. Expertly **leverages an AI-integrated workflow** (LLMs, Claude, ChatGPT) to accelerate development and shipping velocity. Specialized in bridging the gap between technical complexity and high-pressure user impact.

Tools & Technologies

Languages & Web: JavaScript, React, Python, Swift, SwiftUI, Three.js, HTML, CSS
Tools & AI: Claude, Prompt Engineering, Git, Github, LLMs

Technical Projects

- RepSpeed** | AirPods-based velocity tracker | Swift, SwiftUI Ongoing
- Developing an iOS application that estimates barbell squat velocity using AirPods motion-sensor data
 - Engineered custom physics models in Swift to track vertical acceleration and velocity.
- Personal Website** | interactive 3D portfolio | JavaScript, React, Three.js Jun 2026
- Developed an engaging, theme-driven 3D interface to showcase technical range and project depth
 - Built a fully responsive 3D environment from scratch using React and Three.js, managing custom physics simulations, models and dynamic lighting
- Spike Timer Analyzer** | computer vision timing tool | JavaScript, React Mar 2026
- Stabilized athlete scoring and point consistency by building a computer-vision tool that extracted biomechanical data to provide real-time feedback and reduce spike-timing errors
 - Implemented real-time movement marker extraction (takeoff, contact, landing) using JavaScript and React to evaluate and visualize spiking mechanics.
- Volleyball Stat Tracker** | real-time data tracking app | React Feb 2026
- Optimized performance and in-match tactical agility by engineering a real-time React application to surface performance gaps, contributing to a climb from Division 3 to Division 2
 - Reduced data-entry latency by designing optimized React input flows and data models to highlight live tactical insights

Certifications & Training

- Anthropic – Claude Code 101**
- Learned the Explore → Plan → Code → Commit workflow and context management practices (CLAUDE.md, /compact, /clear) for building software with an AI coding agent
- Anthropic – Claude 101**
- Gained foundational hands-on knowledge of Claude’s features and effective prompting techniques for building and automating workflows with AI
 - Learned best practices for giving Claude clear context and instructions to produce accurate, useful results
- Anthropic – AI Fluency: Frameworks & Foundations**
- Studied core frameworks for working effectively with AI systems – how large language models reason, their capabilities and limitations and strategies for applying them responsibly

Education

University of British Columbia – Bachelor of Science (BSc), Biology | Vancouver, BC

Work Experience

- Barista – Starbucks** | Vancouver, BC & San Francisco, CA Sept 2023 - Sept 2025
- Handled 100+ transactions per shift across high-traffic locations, optimizing drink sequencing and open/close procedures with accuracy and dependability under pressure

Leadership & Analysis

- Sports Analytics Developer & Coach – Hustle Volleyball Club** | Burnaby, BC Feb 2026 - May 2026
- Performance Analyst & Assistant Coach – Vancouver College** | Vancouver, BC Sept 2025 - Dec 2025
- Head Coach – Hustle Volleyball Club** | Burnaby, BC Sept 2024 - May 2025
- Analyzed 5+ matches weekly, turning performance data into actionable adjustments while developing athletes
 - Designed and ran structured training programs, communicating data-driven insights clearly to players and staff
 - Led teams through high-pressure decisions, building collaboration, accountability, and trust across the group
