

Jacob Rosario

Vancouver, BC | 604-230-8765 | jacobrosario0225@gmail.com | Eligible to work in the U.S.A. as a citizen. | [linkedin.com/in/jacob-rosario-84a072341](https://www.linkedin.com/in/jacob-rosario-84a072341) | <https://github.com/jrosario0225> | jacobrosario.com

Professional Summary

Software Engineer with a background in data-driven performance analysis and biology. Built and shipped real-time computer-vision applications that drove a competitive program's rise from Division 3 to Division 2. Expertly leverages an AI-integrated workflow (LLMs, Claude, ChatGPT) to accelerate development and shipping velocity. Specialized in bridging the gap between technical complexity and high-pressure user impact.

Skills

Languages & Web: JavaScript, React, Python, Swift, SwiftUI, Three.js, HTML, CSS

Tools & AI: Claude, Prompt Engineering, Git, Github, LLMs

PROJECTS

RepPower

Present

- Developing an iOS application that estimates barbell squat velocity using AirPods motion-sensor data
- Engineered custom physics models in Swift to track vertical acceleration and velocity.

Personal Website

Jun 2026

- Developed an engaging, theme-driven 3D interface to showcase technical range and project depth
- Built a fully responsive 3D environment from scratch using React and Three.js, managing custom physics simulations, models and dynamic lighting

Spike Timer Analyzer

Mar 2026

- Stabilized athlete scoring and point consistency by building a computer-vision tool that extracted biomechanical data to provide real-time feedback and reduce spike-timing errors
- Implemented real-time movement marker extraction (takeoff, contact, landing) using JavaScript and React to evaluate and visualize spiking mechanics.

Volleyball Stat Tracker

Feb 2026

- Optimized performance and in-match tactical agility by engineering a real-time React application to surface performance gaps, contributing to a climb from Division 3 to Division 2
- Reduced data-entry latency by designing optimized React input flows and data models to highlight live tactical insights

Certifications

- Anthropic – Claude Code 101: Learned the Explore → Plan → Code → Commit workflow and context management practices (CLAUDE.md, /compact, /clear) for building software with an AI coding agent
- Anthropic – Claude 101: Gained foundational hands-on knowledge of Claude's features and effective prompting techniques for building and automating workflows with AI. Learned best practices for giving Claude clear context and instructions to produce accurate, useful results
- Anthropic – AI Fluency: Frameworks & Foundations: Studied core frameworks for working effectively with AI systems – how large language models reason, their capabilities and limitations and strategies for applying them responsibly

EDUCATION

University of British Columbia

Bachelor of Science (BSc), Biology

Vancouver, BC

- **Achievements:** Dean's List

Work Experience

Starbucks

Sep 2023 - Sep 2025

Barista

Vancouver, BC & San Francisco, CA

- Handled 100+ transactions per shift across high-traffic locations, optimizing drink sequencing and open/close procedures with accuracy and dependability under pressure

Hustle Volleyball Club

Feb 2026 - May 2026

Sports Analytics Developer & Coach

Burnaby, BC

Designed and ran structured training programs, communicating data-driven insights clearly to players and staff

Vancouver College

Sep 2025 - Dec 2025

Performance Analyst & Assistant Coach

Vancouver, BC

Analyzed 5+ matches weekly, turning performance data into actionable adjustments while developing athletes

Hustle Volleyball Club

Sep 2024 - May 2025

Head Coach

Burnaby, BC

Led teams through high-pressure decisions, building collaboration, accountability, and trust across the group
